Vinyanda Chirwa

Malawi

Thanks to your partnership, members of Vinyanda Chirwa now are enjoying clean drinking water and the prospects of a healthier future. A new water point, built within the community, is providing 121 people with an accessible source of clean water.

Water, sanitation, and hygiene committees, comprised of community members, are trained and committed to managing the water systems and ensuring the availability of water for generations. Thanks to their focus on community empowerment and sustainability, most of World Vision's wells established more than 15 years ago remain operational.

World Vision is multiplying the health benefits of clean water by addressing sanitation and hygiene in Vinyanda Chirwa. Activities include helping people build and maintain latrines and providing education on the importance of handwashing. Water, sanitation, and hygiene interventions can dramatically reduce child disease, malnutrition, and death, while increasing school enrollment, attendance and performance, especially among girls. The interventions also multiply income at the household and community level.

Thank you for helping to improve health and save lives by providing clean water to families in Vinyanda Chirwa. We are grateful for your partnership.
